MR-250MF MULTI-FUNCTION MACHINE ROOM STATION

FEATURES AND BENEFITS

MR-250MF

- Phone out (for tech support)
- Phone in (from outside the complex)
- Call any elevator connected to the LS-250 System
- Call any other machine room (MR-250MF)
- Call the Lobby Rescue Station
- Call the security offices (any Remote Station)
- Call any machine room from the lobby or security office
- No limit to the number of MR-250MF's (subject to the max 80 elevator phones + machine room phones)

Description: The Multi-Function Machine Room Phone offers full flexibility for an elevator installation.

Calling Out:

The MR-250MF enables calls into every elevator phone, the Lobby Rescue Station and the CACF and Security Desk if all are connected to the LS-250 Rescue Station System, as well as every other machine and control room equipped with an MR-250MF. Calls can also be made out of the building if a regular Telco line is connected to the Rescue Station.
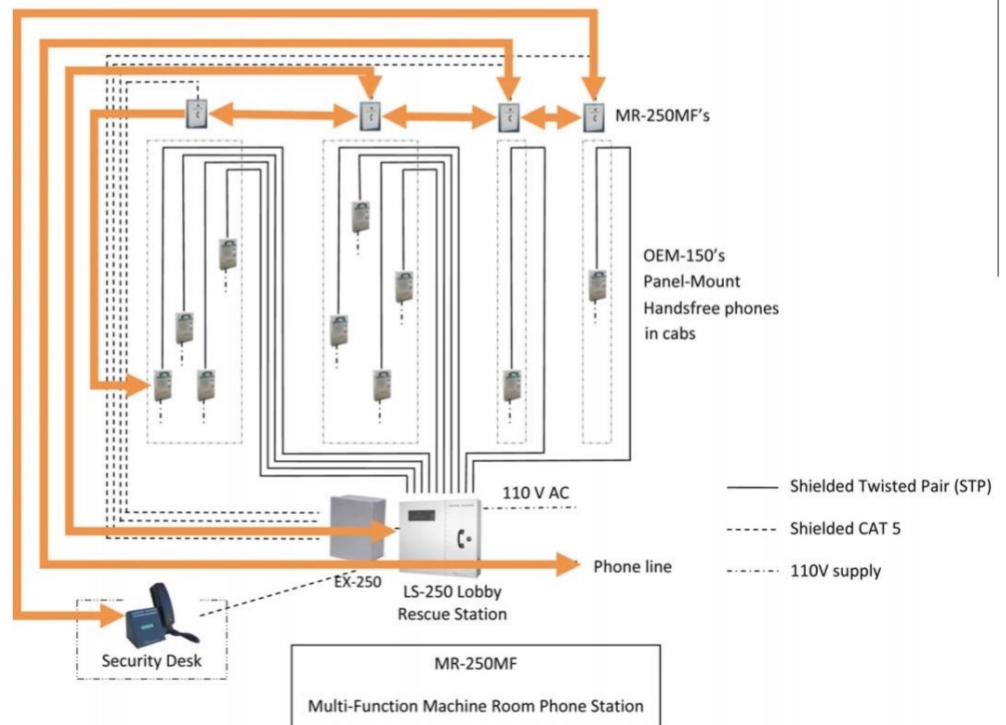

Calling In:

Calls can be made into any MR-250MF (in the same way one calls into an elevator) from outside or from the Lobby Rescue Station, the CACF or a security desk

WEBB ELECTRONICS
