

Web-Enabled 2 Way Audio/Video Entry System Vandal-Resistant Design keeps your building SAFE.

VISION-2300

23" Touchscreen Entry System

Webb Electronics has pioneered a new entry system that will transform the access-system industry. The Web Vision-2300 is a transparent web-enabled entry access system specifically design for multi-residential buildings and office towers. Stylish and modern, the Vision-2300 truly brings together form and function with a gesture-controlled touch screen, multi-lingual voice prompts and complete integration into the Webb Vision product line.

The Webb Vision-2300 is unlike anything on the market and sets a new standard for entry systems. It features a flush mount or surface mount body that is only 2 3/4" thick if surface mounted or mounts flush with the optional trim ring with a 23" touch display supporting 20 simultaneous touch points with a seamless bezel-free design. An impressive feature in any lobby **indoors or outdoors and is rated Nema 4x and IP66**. The Vision-2300 has all the key security requirements you would expect from a state-of-the-art system including lobby door and/or elevator floor restrictions and scalability to incorporate future reader technologies. Optional features include incorporating a built-in camera to read a temporary 2D QR code displayed from a printout and a smartphone to grant access or call a resident or property manager immediately.
